

nuuk

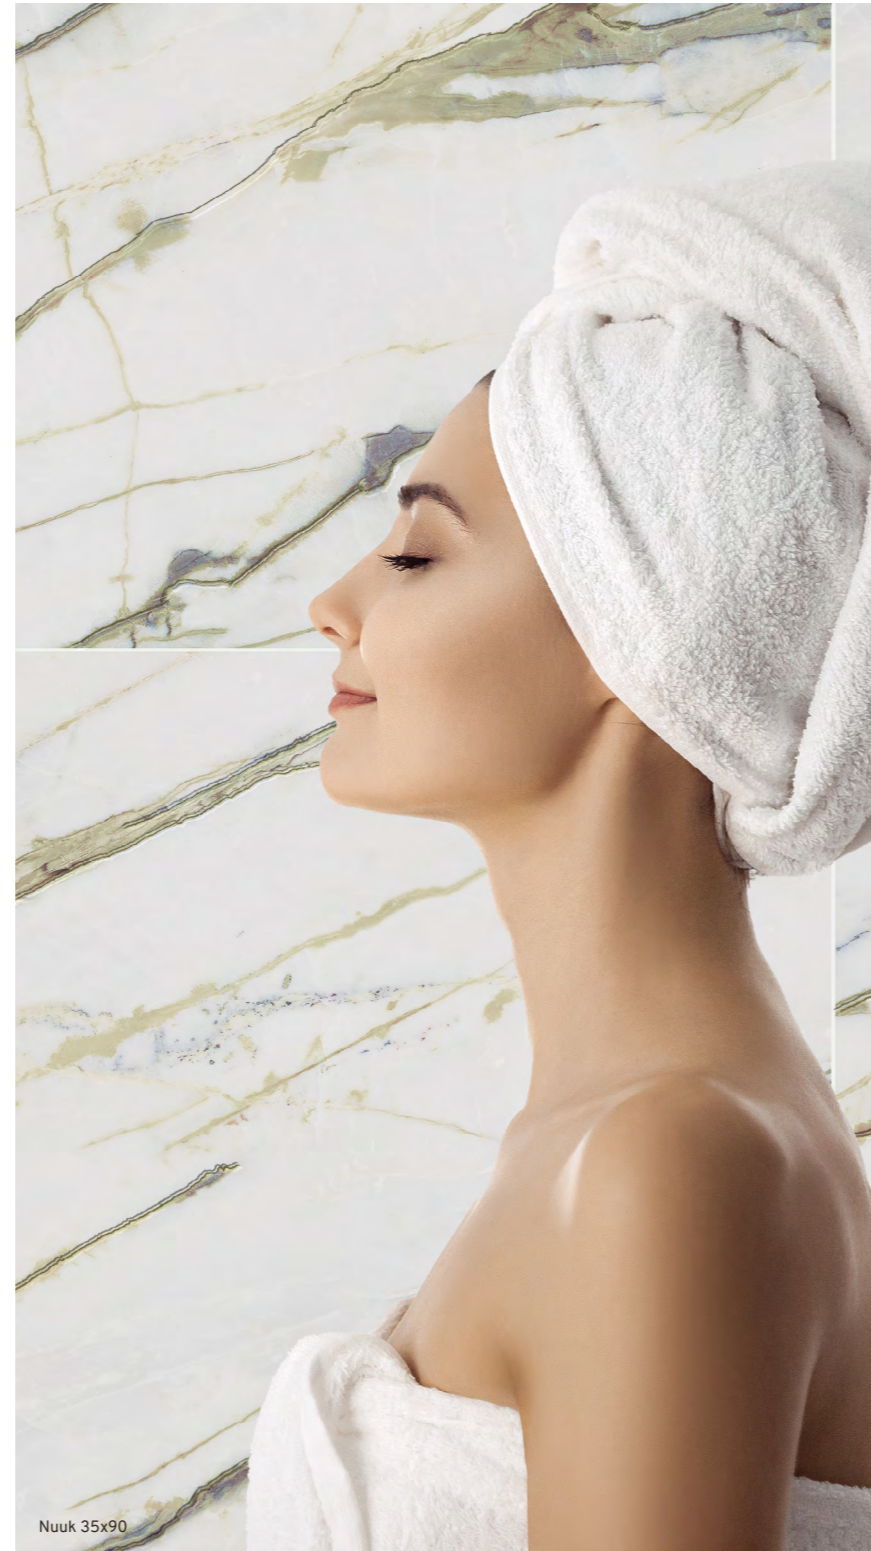

Veteado verde como protagonista en la serie NUUK

Su nombre "NUUK" es la capital de Groenlandia, la cual está localizada al final del fiordo "Nuup" en referencia a la pureza y la blancura que predominan en el diseño.

Nos hemos basado en el mármol original llamado "Aurora Green", caracterizado por un fondo que oscila del grisáceo al blanco. Por encima un veteado más oscuro acompañado de matices de óxido combinados con las suaves y características aureolas que tienden al verde. Existe una variedad más común denominada "Calacatta Aurora" que se extrae en el norte de Italia, pero esta singularidad de matices verdosos proviene de unas remotas canteras en China.

*Green-veined as the main feature in the NUUK series
Its name "NUUK" comes from the capital of
Greenland, which is located at the end of the "Nuup"
fjord in reference to the purity and whiteness that
predominate in its design.*

*We have developed this design based on the original
marble called "Aurora Green", characterized by a
background that ranges from greyish to white.
Above it, a darker veining accomped by shades of rust
combined with the soft and characteristic halos that
tend to green. There is a more common variety of this
marble, called "Calacatta Aurora" that is mined in
northern Italy, but this unique greenish tinge comes
from remote quarries in China.*
