

Galena

GALENA es el resultado de un laborioso trabajo con las materias primas que ha permitido obtener una pieza con carácter y personalidad, sin renunciar a la sencillez.

Esta serie destaca por la dualidad entre las formas originales y las artificiales, donde sus colores vivos y la heterogeneidad de geometrías sencillas conviven con la naturaleza del material cerámico más puro.

GALENA is the result of intense work with the raw materials to get a piece with character and personality without giving up on simplicity.

This series stands out because of the duality of the original and artificial shapes where the bright colours and simple heterogeneous geometries blend in with the purest of natural ceramic material.
